**GLOBAL
BIOETHANOL
COALITION**

WHO WE ARE

Pivot Clean Energy Co. (Pivot) is a nonprofit industry coalition that works to increase the global use of bioethanol for household energy. Pivot coordinates and works with multiple stakeholders to deliver bioethanol to households globally.

Led by experts in the biofuels, health, agriculture, and household energy sectors, members of Pivot include producers, traders, business operators, and the wider development community.

WHY SUPPORT PIVOT?

Vibrant bioethanol economies contribute directly to:

- Increased access to a clean cooking fuel for the 4 billion people who currently cook with traditional, dirty fuels
- New market opportunities for bioethanol use, including transportation
- Positive health, economic, and climate impacts, including reductions in global CO2 emissions
- Increased investment in agriculture at the local and regional scale
- Alignment with corporate ESG priorities and international Sustainable Development Goals

Join Today!

Support bioethanol growth on a global scale.

MISSION

Improve human health, protect our global environment, and create green jobs by accelerating the transition to renewable bioethanol to meet modern household energy demands.

OUR WORK

"The enormity of the global household energy challenge warrants an equal response from industry to capture the opportunity of universal access to clean energy by 2030."

Dan Seals
Board President, Pivot

EARLY STAGE BUSINESS DEVELOPMENT

We catalyze bioethanol businesses globally by funding early stage enterprises. Through our grant program, businesses and organizations can more effectively scale in target geographies.

REGIONAL FUEL SUPPLY

We support the development of regional bulk fuel storage facilities. Pivot's goal over the next 5 years is to build a 2+ million gallon port storage facility in Southern Africa, which will provide access to reliable, affordable, and quality fuel for the region.

POLICY

We work with regional and local governments to improve taxation and standards for bioethanol. Smart policy allows bioethanol to reach consumers affordably and safely.

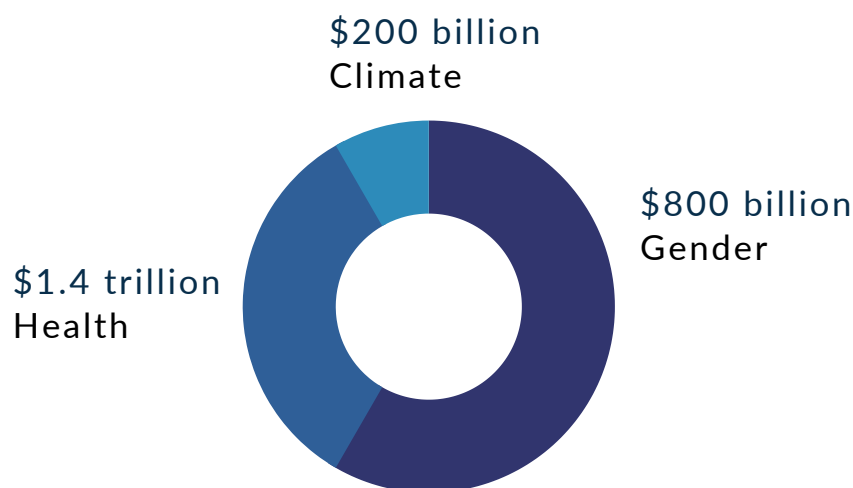

CLEAN COOKING | BY THE NUMBERS

4 BILLION People globally cook with **solid or fossil fuels**

4 MILLION Deaths related to **Household Air Pollution (HAP)**

\$4.2 TRILLION Cost of inaction over the **next 10 years**

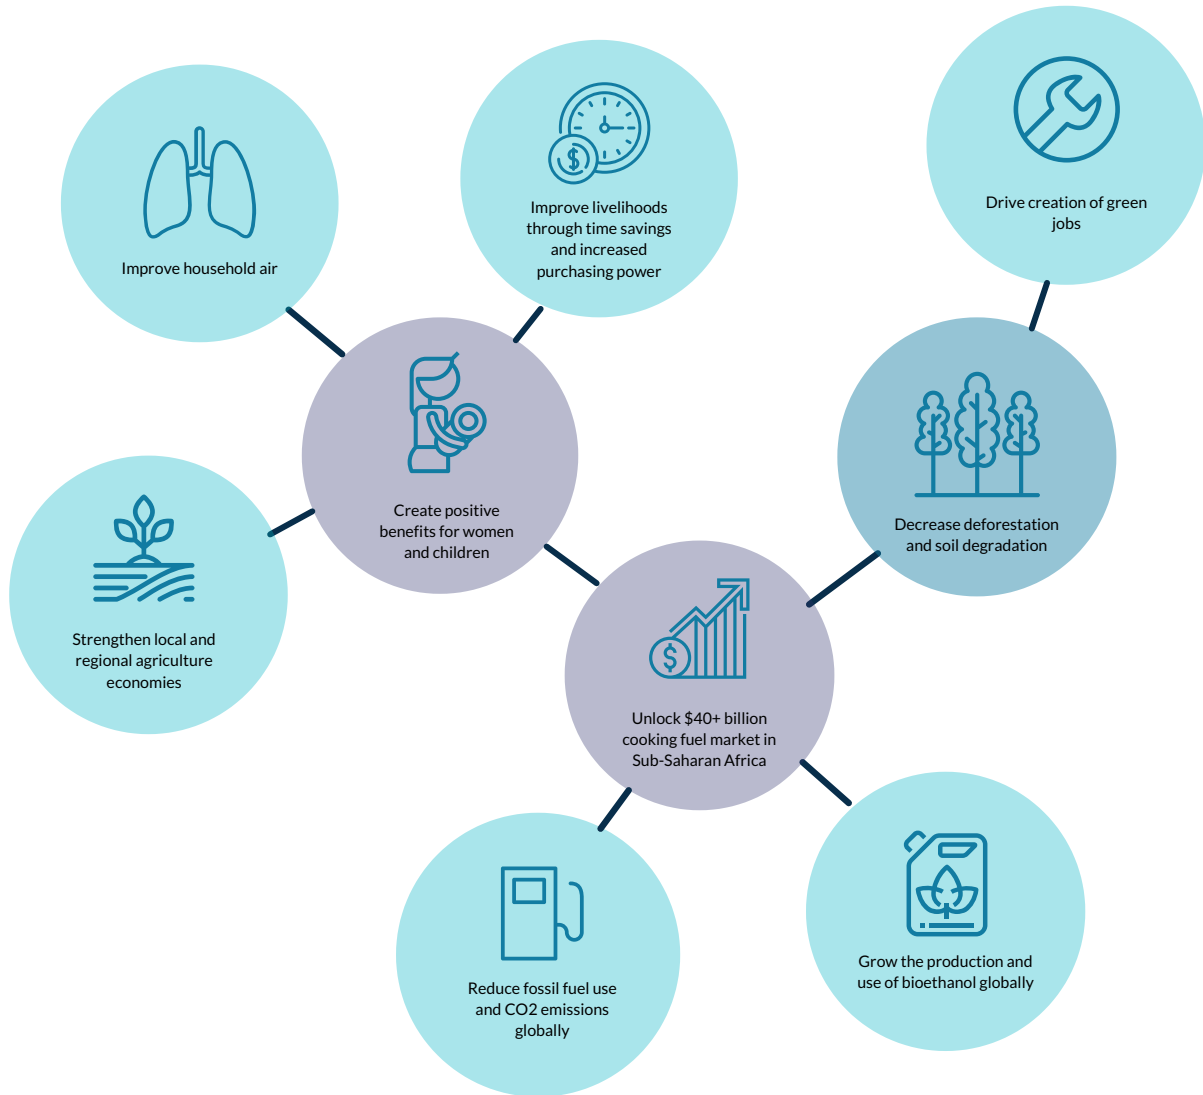

\$1.5 TRILLION Required by **2030 to meet universal access** to Modern Energy Cooking Services (MECS)

\$150 billion Required annually across **all sectors**

\$11 billion Required annually from **private sector**

UNLOCK THE POWER OF AGRICULTURE + ENERGY FOR ALL
